

IN THE SPECIFICATION

On page 7, line 24, between "signal" and "from", please insert --directly--.

Replacement paragraph

---

The input circuit of the power supply assembly 10 is the rectifier and filter circuit 12, which is shown in FIGURE 2A. The circuit 12 includes a means for receiving an audio signal directly from the audio amplifier 30 via a connector J1 and a fuse F1. The audio signal is initially filtered by a full-wave rectifier, consisting of diodes D1-D4 and filtered by a pair of electrolytic capacitors C1 and C2 from where the output from the circuit 12 is a direct current.
